

How to connect to the ubcvisitor Wi-Fi network.

1. Find the **ubcvisitor** network and click “Connect” (or if you aren’t on windows, do the equivalent steps for finding and connecting to a network)

2. Wait for the ubcvisitor access page to pop up in your browser. (If nothing pops up, try opening a page on your browser and refreshing)

 Visitor Wireless Access

Note: The ubcvisitor WiFi network is intended for visitors to the University. This network **does not** allow access to myVPN, SSC and other UBC resources. UBC students, faculty and staff must use the ubcsecure or eduroam WiFi networks.

Visitor Access Wireless Use Policy
Please read the Acceptable Use Policy.

Acceptance of the Terms of Use means that:

1. You agree to adhere to the Terms of Use, as defined below;
2. You must comply with UBC's terms of Acceptable Use;
3. You will not engage in any Illegal or Unacceptable Uses.

Terms of Use: This service is intended for use by visitors to UBC. UBC faculty, staff, and students, should access the UBC or UBCSecure wireless networks for optimal performance.

You acknowledge that

1. You shall be fully responsible for any consequences resulting from your use of the UBC Visitor Wireless network (hereafter referred to as "the Service");

Accept

Decline

3. After reading the agreement, scroll to the bottom and the "Accept" button will no longer be grayed out. Click "Accept" and you are done.

 Visitor Wireless Access

Note: The ubcvisitor WiFi network is intended for visitors to the University. This network **does not** allow access to myVPN, SSC and other UBC resources. UBC students, faculty and staff must use the ubcsecure or eduroam WiFi networks.

Visitor Access Wireless Use Policy
Please read the Acceptable Use Policy.

10. Intercepting or examining the content of messages, files or communications in transit on a data network.

Limited Support

1. The maximum data speed of the Service is significantly lower than the speed of the campus wired and other wireless networks.
2. Performance varies and cannot be guaranteed.
3. Off-campus connections to the Service are not permitted.
4. Devices connecting to the Service must be capable of meeting minimum standards, as defined by UBC IT. Some older devices do not meet these standards, and may not be used with the Service.

The intent of these Terms of Use is to identify acceptable usage, but these Terms of Use do not list all possible unacceptable or illegal uses. Using the guidelines given above, UBC may, at any time, make a determination that a particular use is unacceptable.

You must accept these Terms of Use to continue.
